

# Julian Costello Quartet

*Delicate and melodic... saxophone led original material with nods to Jan Garbarek and Ralph Towner* TIME OUT

The new and international Julian Costello Quartet is energetic, creative and has humour. They recently toured in England and got absolutely fantastic reactions from audiences. They clearly get on well and this comes across in their intense, yet amusing sets that move you in different ways and take you places. A group of musicians talking and improvising without competition but instead collaborating. Julian Costello writes most of the music and gently directs the band, Maciek is a very creative and expressive guitarist who plays solos that develop wonderfully, Yuri is the strong glue that holds the band together, who shines when he has solos and Adam is an amazing drummer very much in demand, who also plays percussion.
